1. Nature of Operations

Salazar Resources Limited (the "Company") was incorporated on July 23, 1987 under the provisions of the Company Act (British Columbia). The Company's common shares are listed and trade on the TSX Venture Exchange ("TSXV") under the symbol "SRL" and on the Frankfurt Exchange under the symbol "CCG". The Company's executive head office is located in Quito, Ecuador.

The Company is a junior mineral exploration company currently engaged in the acquisition and exploration of mineral properties located in Latin America. On the basis of information to date, the Company has not yet determined whether these properties contain economically recoverable ore reserves. The underlying value of the exploration and evaluation assets is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete development and upon future profitable production. Exploration and evaluation assets represent costs incurred to date, less amounts depreciated and/or written off, and do not necessarily represent present or future values.

The Company's mineral properties are located in Ecuador and consequently the Company is subject to certain risks, including currency fluctuations and possible political or economic instability which may result in the impairment or loss of mining title or other mineral rights, and mineral exploration and mining activities may be affected in varying degrees by political stability and governmental regulations relating to the mining industry.

The Company has negotiated a number of agreements to provide continued funding for exploration of its exploration and evaluation assets, as described in Note 4. As at September 30, 2020 the Company had working capital of $2,681,622 and management considers that the Company has adequate resources to maintain its core operations and, with the financial support of its partner, conduct ongoing exploration programs on its existing exploration and evaluation assets for the next twelve months.

These condensed consolidated interim financial statements do not include adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

On March 11, 2020 the World Health Organization ("WHO") declared a global pandemic of the novel coronavirus identified as "COVID-19". In order to combat the spread of COVID-19 governments worldwide, including Ecuador and Canada, have enacted emergency measures including travel bans, legally enforced or self-imposed quarantine periods, social distancing and business and organization closures. These measures have caused material disruptions to businesses, governments and other organizations resulting in an economic slowdown and increased volatility in national and global equity and commodity markets . In March the Company and its strategic partner temporarily suspended all its site activities at the Curipamba, Pijili and Santiago projects, while desktop and office work continues remotely where possible. Most recently, there has been partial lifting of COVID-19 related restrictions and the Company has restarted field and drilling activities, at both the Curipamba and Pijili projects and other Company owned projects. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of any intervention.

2. Basis of Preparation

Statement of Compliance

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, *Interim Financial Reporting* ("IAS 34"), as issued by the International Accounting Standards Board ("IASB"), and its interpretations, using accounting policies consistent with International Financial Reporting Standards ("IFRS"). The condensed consolidated interim financial statements should be read in conjunction with the annual financial statements for the year ended December 31, 2019, which have been prepared in accordance with IFRS as issued by the IASB and interpretations of the IFRS Interpretations Committee ("IFRIC"). 4. Exploration and Evaluation Assets (continued)

The Company holds interests in the following properties in Ecuador:

(a) ***Curipamba Project***

The Company owns a 100% interest in seven concessions (the "Curipamba Project") located in the provinces of Bolivar and Los Rios, Ecuador. The Curipamba Project is subject to a 2% net smelter return royalty ("NSR").

On September 14, 2017, as amended September 19, 2019, the Company entered into a definitive option agreement (the "Curipamba Option") whereby Adventus Mining Corporation ("Adventus") may earn (the "Earn-In") a 75% interest in the Company's Curipamba Project by funding costs on the Curipamba Project of US $25,000,000 over the next five years, including the completion of a feasibility study on the El Domo deposit, subject to certain exceptions. A feasibility study was required to be completed no later than October 5, 2021, after which Adventus is required to fund 100% of the development and construction expenditures to commercial production. Due to the COVID-19 outbreak, as described in Note 1, the feasibility study earn-in requirement of October 5, 2021 will be delayed by the number of days that site activities have been shutdown, starting from March 17, 2020.

Adventus will provide the Company with non-refundable advance payments of US $250,000 per year until achievement of commercial production, to a maximum cumulative total of US $1,500,000. As at September 30, 2020 the Company has received total advance payments of US $750,000.

Upon achievement of commercial production, Adventus will receive 95% of the dividends from the Curipamba Project until its aggregate investment, including the US $25,000,000, has been recouped minus the approximate Company carrying value of US $18,200,000 when the Curipamba Option was signed, after which dividends will be shared on a pro-rata basis according to their respective ownership. In certain circumstances where project development is delayed post earn-in, Adventus' ownership position could be diluted.

Adventus has also agreed to pay the Company a 10% management fee on certain expenditures for the duration of the Curipamba Option, with a prescribed minimum annual amount of US $350,000 by each anniversary date. During the nine months ended September 30, 2020 the Company earned $355,399 (December 31, 2019 - $464,380) in management fees and as at September 30, 2020, $122,522 (December 31, 2019 - $119,980) remained outstanding and was included in amounts receivable.

During the nine months ended September 30, 2020 Adventus funded a total of $6,676,613 for costs incurred by the Company, of which $2,055,334 was applied against property, plant and equipment, $4,350,393 against exploration and evaluation assets and $270,886 as an expense recovery.

During fiscal 2019 Adventus funded a total of $10,214,730 for costs incurred by the Company, of which $3,261,960 was applied against property, plant and equipment, $6,489,350 against exploration and evaluation assets and $463,420 as an expense recovery. As at December 31, 2019 a balance of $288,182 remained as advances from the joint-venture partner and $397,896 remained in restricted cash.

Estimated volatility	94% - 100%	100%

The weighted average measurement date fair value of all share options recognized during the nine months ended September 30, 2020 was $0.17 (2019 - $0.10) per share option.

Option-pricing models require the use of estimates and assumptions including the expected volatility. 8. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following categories: FVTPL; FVOCI and amortized cost. The carrying values of the Company's financial instruments are classified into the following categories:

Financial Instrument	Category	September 30, 2020 $	December 31, 2019 $
Cash	FVTPL	2,368,464	4,079,065
Restricted cash	FVTPL	440,437	397,896
Amounts receivable	Amortized cost	122,552	123,390
Accounts payable and accrued liabilities	Amortized cost	(1,903,228)	(463,840)
Advances from joint-venture partner	Amortized cost	(30,718)	(288,182)

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for amounts receivable, accounts payable and accrued liabilities and due from joint venture partner approximate their fair value due to their short-term nature. The Company's cash, restricted cash and investments under the fair value hierarchy are measured using Level 1 inputs.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash and amounts receivable is remote.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

8. Financial Instruments and Risk Management (continued)

	Contractual Maturity Analysis at September 30, 2020				
	Less than 3 Months $	3 - 12 Months $	1 - 5 Years $	Over 5 Years $	Total $
Cash	2,368,464	-	-	-	2,368,464
Restricted cash	440,437	-	-	-	440,437
Amounts receivable	122,552	-	-	-	122,552
Accounts payable and accrued liabilities	(1,903,228)	-	-	-	(1,903,228)
Advances from joint-venture partner	(30,718)	-	-	-	(30,718)

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

(b) Foreign Currency Risk

The Company's significant subsidiary is located in Ecuador which has adopted the US Dollar as its currency.

The Company also maintains cash deposits in US Dollars with its Canadian bank. As such, the fluctuation of the Canadian Dollar in relation to the US Dollar will have an impact upon the profitability of the Company and may also affect the value of the Company's assets and the amount of shareholders' equity. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks. At September 30, 2020, 1 Canadian Dollar was equal to 0.75 US Dollar.

Balances are as follows:

	US $	CDN $ Equivalent
Cash	432,755	577,006
Restricted cash	330,188	440,437
Amounts receivable	91,875	122,552
Due to joint-venture partner	(23,029)	(30,718)
Accounts payable and accrued liabilities	(1,381,749)	(1,842,332)
	(549,960)	(733,055)

Based on the net exposures as of September 30, 2020 and assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the US Dollar would result in the Company's net loss being approximately $74,000 higher (or lower).

(Unaudited - Expressed in Canadian Dollars)

8. Financial Instruments and Risk Management (continued)

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain development of the business. The Company defines capital that it manages as share capital and cash. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.
