## FORWARD - LOOKING INFORMATION

This presentation contains "forward-looking information" within the meaning of applicable Canadian securities laws. Forward-looking information is based on the beliefs, expectations and opinions of the management as of the date the statement is published, and assumes no obligation to update any forward-looking information, except as required by law. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects", "outlook", "guidance", "budget", "scheduled", "estimates", "intends", "anticipates" or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might", "will be taken", "occur" or "be achieved" or the negative of these terms or comparable terminology.

Forward-looking information relates to future events or future performance and reflects Salazar Resources Ltd.'s (or the Company's) management's expectations or beliefs regarding future events including, but not limited to, statements and information related to the results of the feasibility study and updated Mineral Reserves for El Domo, including the forecasted economics of the Curipamba project, expected gold, silver, copper and zinc production (and the grade of such gold, silver, copper and zinc production) from the Curipamba project and projected operating and capital costs associated with the Partner's planned operations at the Curipamba project, and the Proven and Probable reserves of gold, silver, copper and zinc; statements and information related to the results of the PEA, including the forecasted economics and the additional indicated and inferred gold, silver, copper and zinc resources; statements and information relating to the mining process; the projected taxes and LOM royalties to the Ecuadorian government; the 2% NSR royalty payable to Altius Mining Corporation; statements and information relating to the ESIA; statements and information relating to the discussions regarding the non-equity financing; the estimated mine life of the project; gold, silver, copper and zinc price assumptions; exchange rate assumptions; the merits of the Curipamba project; mineral exploration activities in the El Tigre - Macara, Pijili, Santiago and Tarqui - Quimi projects; and other statements regarding future plans, expectations, guidance, projections, objectives, estimates and forecasts, as well as statements as to management's expectations with respect to such matters.

Forward-looking statements are necessarily based upon estimates and assumptions, which are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond the Company's control and many of which, regarding future business decisions, are subject to change. Assumptions underlying the Company's expectations regarding forward-looking statements or information contained in this presentation include, but are not limited to, the Company will be able to accomplish its plans and objectives with respect to the FS, PEA, ESIA and the Curipamba project on the expected timeline; market fundamentals will accord with the estimates and assumptions contained in the FS and PEA; the receipt of any necessary approvals and consents in connection with the development of the Curipamba project in a timely manner; that the cost estimates presented in the FS and PEA are representative of the actual costs associated with the development, operation and closure of the Curipamba project; sustained commodity prices such that the Project remains economically viable; and that the geology of the Curipamba project accords with the expectations and projections presented in the FS and PEA and that the Company and Partner will be able to mine at the Curipamba project in accordance with the specifications set out in the FS and PEA.

By their very nature, forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company and Partner to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information.

Such factors include, among others, risks related to the ability of the Company and its Partner to accomplish its plans and objectives with respect to the FS, PEA and the Project within the expected timing or at all, including the ability of the Company and Partner to improve the economics and finance-ability and de-risk the Curipamba project; the timing and receipt of certain approvals and the risk that certain necessary approvals may never be received; changes in commodity and power prices; changes in interest and currency exchange rates; that the cost estimates presented in the FS and PEA may not be representative of the actual development, construction, operational and closure costs associated with the Curipamba project; risks inherent in exploration estimates and results; the timing and success of the development of the Curipamba project is not guaranteed and the Partner may not construct and operate the Curipamba project on the timelines or in the manner presented in the FS or PEA, or at all; that the Partner may be unable to conclude the non-equity financing and may be required to pursue other methods of financing the Curipamba project, or may be unsuccessful in financing the Curipamba project; inaccurate geological, mining, and metallurgical assumptions (including with respect to size, grade and recoverability estimates, estimates of mineral reserves and resources and mine life estimates); changes in development or mining plans due to changes in logistical, technical or other factors; unanticipated operational difficulties (including failure of plant, equipment or processes to operate in accordance with specifications, cost escalation, unavailability of materials, equipment and third party contractors, delays in the receipt of government approvals, industrial disturbance or other job action, and unanticipated events related to health, safety and environmental matters); that the Partner may not be able to increase expected mine life or expected production through resource conversion, project extension and exploration; political risk; social unrest; changes in general economic conditions or conditions in the financial markets; risks associated with the Partner's investor base; and other risks and uncertainties that are more fully described in the Company's and Partner's respective most recent annual information form, interim and annual consolidated financial statements and management's discussion and analysis of those statements, all of which are filed and available for review under the Company's and Partner's respective profiles on SEDAR at [www.sedar.com](http://www.sedar.com)

Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking information. In addition, there can be no assurance regarding the achievement or timing of the Company's and Partner's exploration, development, construction or commercial production objectives.

Although the Company have attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. The Company provides no assurance that forward-looking information will prove to be accurate, as actual results and future events may differ from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information.

The technical information contained in this presentation has been reviewed and approved by Kieran Downes as a "qualified person" as defined in National Instrument 43-101 Standards of Disclosure for Mineral Projects.

All currency figures in this presentation are in US dollars unless otherwise stated.

## SCIENTIFIC AND TECHNICAL MINING DISCLOSURE

The following independent qualified persons ("IQPs") coauthored the 2021 - NI 43-101 Technical Report – Feasibility Study Curipamba El Domo Project Report. These IQPs have approved the information that pertains to the sections of the Technical Report that they are responsible for:

**Project Management and Infrastructure** - Philip de Weerd, Pr.Eng, PMP, MBA (DRA)

**Metallurgy and Processing:** Volodymyr Liskovych, Ph.D., P. Eng (DRA)

**Geology and Mineral Resource estimate:** Dorota El Rassi, P.Eng. (SLR)

**Mining and Mineral Reserves:** Daniel Gagnon, P.Eng (DRA)

**Hydrology-Waste Management:** Brett Stephens, RPEO, P.Eng, P.E., (KCB)

**Environmental & Community:** Ken Embree P.Eng. (KP)

Each of the individuals above are independent qualified persons for the purposes of National Instrument 43-101.

All scientific and technical information in respect of El Domo and or the Feasibility study is based on information prepared by or under the supervision of those individuals. The Mineral Resource estimate in this presentation has been classified in accordance with CIM Definition Standards - For Mineral Resources and Mineral Reserves (May 14, 2014).

Kieran Downes, P.Geo., a qualified person as defined by National Instrument 43-101 and a consulting geologist for Salazar, is responsible for other scientific and technical disclosure contained in this presentation.

# MINING INDUSTRY IN ECUADOR

**Mining increasingly positioned as a pillar of non-oil economic growth**

**Ecuador returns to Capital Markets**

**Strong social & environmental scrutiny remains**

Government promotes mining to diversify exports, generate fiscal revenues, and attract foreign investment

IMF expands Ecuador program to US\$5B with US\$600M immediate disbursement, citing fiscal progress and structural reform momentum.

Mining expansion is closely watched by communities, courts and NGOs, maintaining permitting and execution challenges.

# SANTIAGO PROJECT:

## Early Stage Copper - Gold & Silver in the Miocene Mineral Belt

### LICENSE DETAILS

2,350 ha

All permits up to date

### LOCATION

Located in the province of Loja, 37km north of the city of Loja.

### INFO & POTENTIAL

Newmont completed shallow drilling on an interpreted lithocap, leaving deeper porphyry potential unexplored. Airborne MMT delineates porphyry signature below shallow drilling.

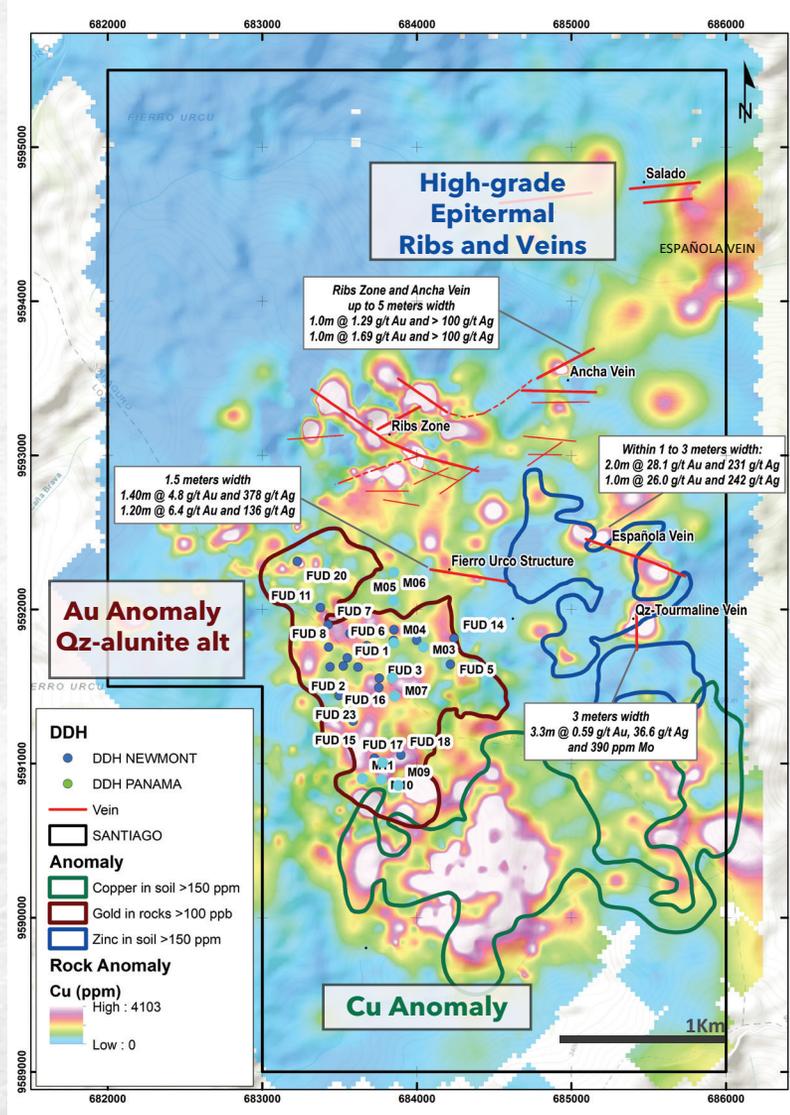

### GEOLOGY

Cu and Au geochemical anomalies with coincident geology, shallow drilling results and geophysical anomaly that includes quartz-alunite alteration. Silver not tested.

### HIGH GRADE STRUCTURE

The veins and structures occur in volcanic rocks adjacent to a felsic intrusive. Wide up to:

- Qz Tourmaline 3m / Ancha Vein 5m
- Ribs Zone 5m
- Española Vein 3m
- FU structure 1.5m

### HISTORICAL SHALLOW DRILLING

- All permits up to date

### LOCATION

Located in the west of Azuay Province, with in a district of artisanal mining activity and prospective for massive copper porphyries i.e. **Chaucha Project**

### INFO & POTENTIAL

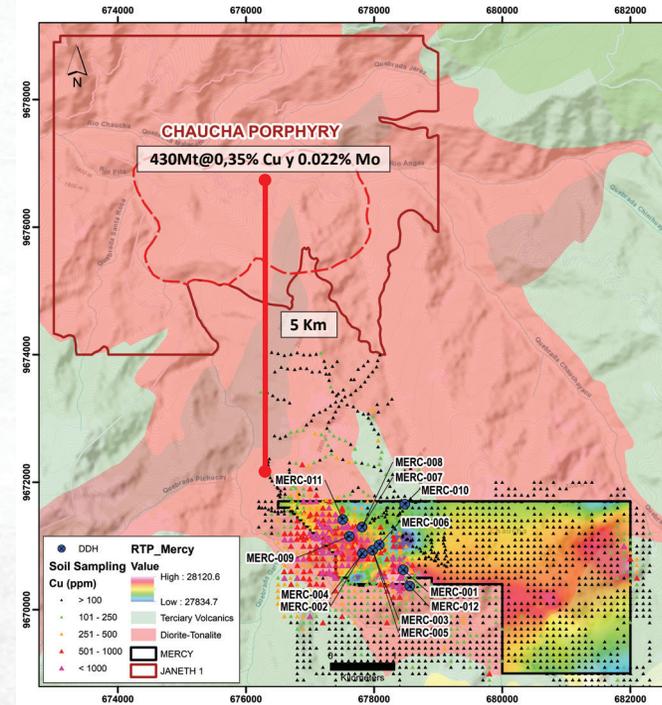

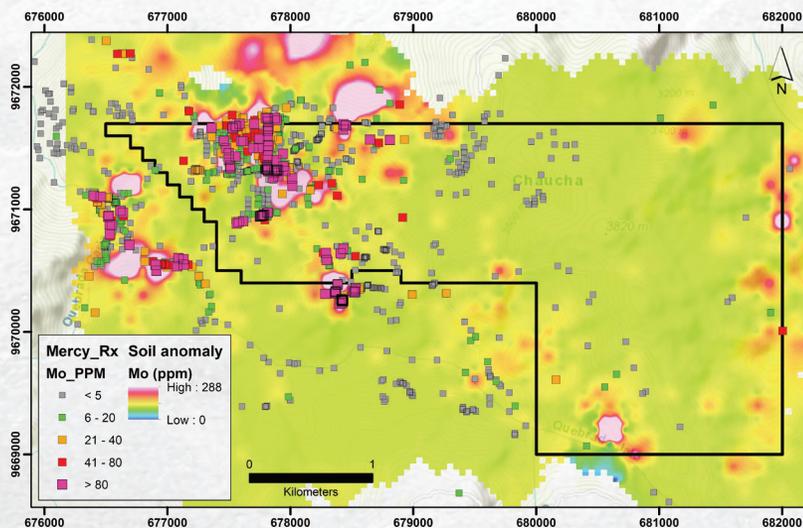

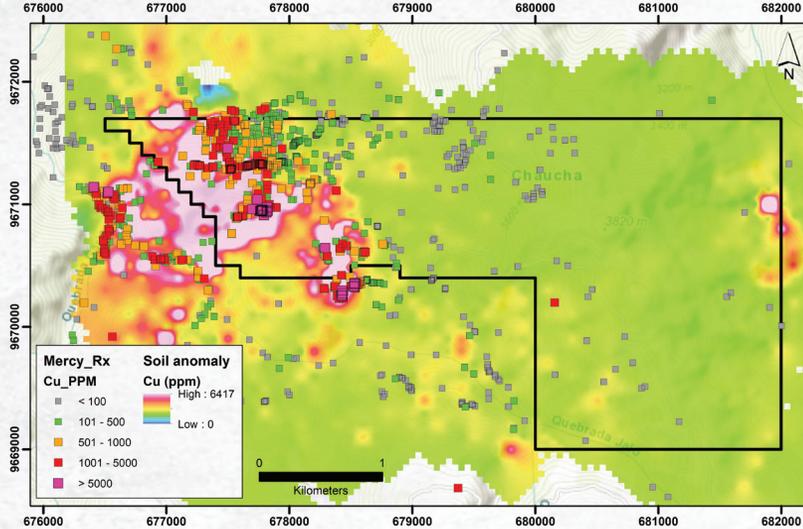

Two Concessions:  
 -Concession Mercy was drilled in 2021-2022 intersecting Cu-Au-Mo mineralization.  
 -Carmen de Pijili with surface geochemical anomalies.

### GEOLOGY

Cu-Au-Mo surface anomaly with related high grade Ag-W mineralization. The mineralization trends with large Chaucha porphyry, located just 3km to the north.

### GEOPHYSICS PROGRAM

Additional geochemical sampling and drilling needed to delineate mineralized body.

### MERCY DRILL HOLES

# EL TIGRE PROJECT

## VMS System + Hydrothermal Breccias Hosted in Pillow Lavas.

### LICENSE DETAILS

300 + 9088 ha requested  
Permits for drilling in progress.

### LOCATION

Located in Loja province at the South of Ecuador, at 90km northeast of the VMS Tambo Grande deposit.

### GEOPHYSICS PROGRAM

Magnetic and Gravimetric Surveys. Coincidental anomalies with soils Au, Cu, Zn.

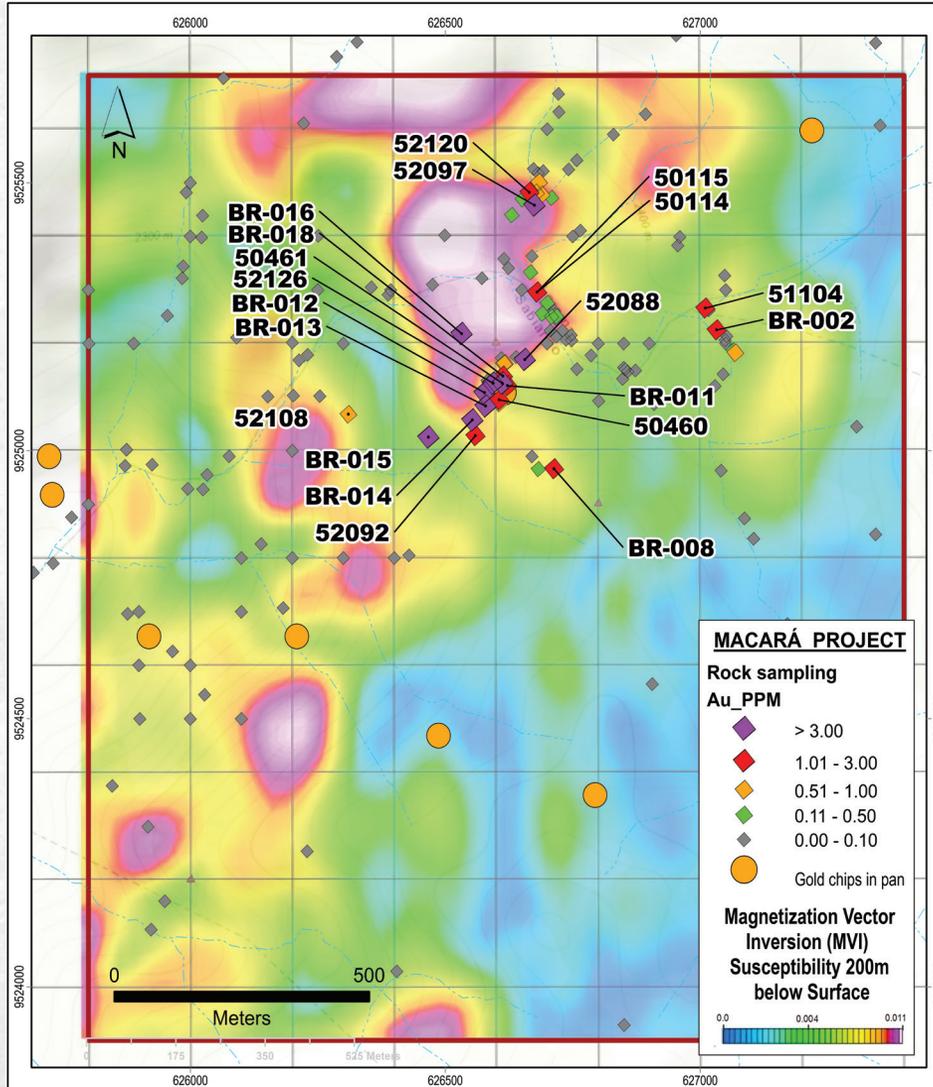

### GEOLOGY

VMS System with hydrothermal breccias + Stockwork hosted in pillow lavas.

**Mineralization:**  
Py + Cpy + Sph, Stockwork + Barite veins.

### TAMBO GRANDE

Ore Body  
**TG1:** 109 Mt tons of 1.6% Cu, 1.0% Zn, 0.5 g/t Au and 22 g/t Ag  
**TG3 (Algarrobos):**  
82 Mt 1.0% Cu, 1.4% Zn, 0.8 g/t Au and 25 g/t Ag.

### GRAV: DENSITY MODEL 200m DEEP

# INVESTMENT HIGHLIGHTS

---

El Domo deposit on track for production - first Au-Cu expected by Mid-2027.

---

New copper-gold exploration portfolio provides discovery upside across multiple targets.

---

SRL trading well below NAV - significant re-rating potential vs. peer group.

---

Long-term value pipeline supported by multi-asset project base.

---

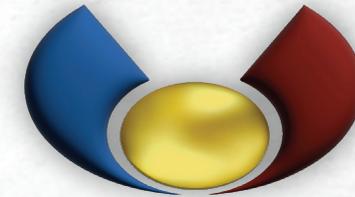

Opportunities in underexplored jurisdiction.

---

Experienced local team with deep regulatory knowledge and community engagement.

# QUIMI CONCESSION:

Early stage Copper -Gold prospect in Jurassic Metallogenic Belt.

Samples taken from the early February 2019 field commission to southern Quimi. A. Strong potassic mottled in biotite altered, medium grained intrusive with epidote veinlets and 5-10% matrix py, 1-2% matrix cpy. B. Albite veins crossing K-altered medium grained Intrusive with 5% matrix py, 1-2% cpy. C. Deformed medium grained intrusive with blotchy epidote-chlorite and py veinlets. D. Barite vein. E. Magnetite and biotite replacement of matrix with mm-scale D veinlet

# EL DOMO - RESOURCES

## Open Pit Resources

Reserve Category	Tonnes (Mt)	Cu (%)	Pb (%)	Zn (%)	Au (g/t)	Ag (g/t)	Cu (kt)	Pb (kt)	Zn (kt)	Au (koz)	Ag (koz)
Proven	3.1	2.50	0.2	2.3	2.83	41	78.4	6.7	72.0	285	4,175
Probable	3.3	1.39	0.3	2.67	2.23	50	46.4	9.4	89.4	240	5,342
Proven + Probable	6.4	1.93	0.2	2.49	2.52	46	124.9	16.2	161.4	525	9,517

Notes: Majority of Proven and Probable Reserves within 40 to 80 m from surface.

## Underground Resources

Resource Category	Tonnes (Mt)	Cu (%)	Pb (%)	Zn (%)	Au (g/t)	Ag (g/t)	Cu (kt)	Pb (kt)	Zn (kt)	Au (koz)	Ag (koz)
Indicated	1.9	2.72	0.14	2.38	1.37	31	51.9	2.6	45.4	84	1,895
Inferred	0.8	2.31	0.11	2.68	1.74	29	17.3	0.8	20.1	42	688

- Located 20 km from Pan-American highway, in low-lying hills (300 - ~900 masl), 3-hour drive from major port city of Guayaquil – key lands acquired for development, including 100% of resource areas.
- Medium scale mining concession titles granted for entire district for 25 years.
- JV Structure – Adventus funds 100% of the capital costs to production, receives 100% of first US\$30M in free cash flows & receives 95% of the free cash flow until all of its investments since October 2017 are repaid less the Salazar historical investment of US\$19.8M, after-which the project cash flows will be shared 75% Adventus & 25% Salazar – NPV ownership ratio: ~87:13 2.

• 10 Mt @ 5% Cu Eq

Mineral Resources

- 737K oz Au
- 14870K Oz Ag
- 208K t Cu
- 23Kt Pb
- 255Kt Zn

Mineral Content

- 1850 tpd
- Open Pit 10 years
- Underground 5 years

Daily Production Estimated

- 10 years life of mine
- Taxes, Royalties & others  
US\$ 376 M
- 3000 Direct & Indirect Jobs

Taxes, royalties and employs estimated

Adventus Mining, Q3-2023.

# EL DOMO - RESOURCES

**Table 1a. Total Mineral Resources for El Domo, Curipamba Project - October 26,2021 (sum of table 1b and 1c)**

Reserve Category	Tonnes (Mt)	Cu (%)	Pb (%)	Zn (%)	Au (g/t)	Ag (g/t)	Cu (kt)	Pb (kt)	Zn (kt)	Au (koz)	Ag (koz)

**Table 2: Open-Pit Mineral Reserves Statement**

Classification	Tonnage (kt)	Cu (%)	Pb (%)	Zn (%)	Au (g/t)	Ag (g/t)	Cu (kt)	Pb (kt)	Zn (kt)	Au (koz)	Ag (koz)
Measured	3,136	2.50	0.2	2.30	2.83	41	78.4	6.7	72.0	285	4175
Indicated	3,343	1.39	0.3	2.67	2.23	50	46.4	9.4	89.4	240	5342
M+I	6,478	1.93	0.2	2.49	2.52	46	124.9	16.2	161.4	525	9517

**Notes:**

1. Waste: Ore Strip Ratio 6.02: 1 not including pre-strip waste and 8.59: 1 including pre-strip waste
2. The effective date of the Mineral Reserve Estimate is October 22, 2021.
3. Mineral Reserves are reported in accordance with CIM Definition Standards (2014) and best practice guidelines (2019).
4. An NSR cut-off grade of US\$32.99 was used for all material.
5. Mineral reserves were estimated at a gold price of \$1,630/oz, a silver price of \$21.00/oz, a lead price of \$0.92/lb, a zinc price of \$1.16/lb, and a copper price of \$3.31/lb; they include modifying factors related to mining cost, dilution, mine recovery, process recoveries and costs, G&A, royalties, and rehabilitation costs.
6. Figures have been rounded to an appropriate level of precision for the reporting of Mineral Reserves.
7. Due to rounding, some columns or rows may not compute exactly as shown.
8. The Mineral Reserves are stated as dry tonnes processed at the crusher.

**Table 1a. Total Mineral Resources for El Domo, Curipamba Project - October 26,2021 (sum of table 1b and 1c)**

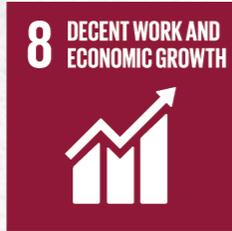

Reserve Category	Tonnes (Mt)	Cu (%)	Pb (%)	Zn (%)	Au (g/t)	Ag (g/t)	Cu (kt)	Pb (kt)	Zn (kt)	Au (koz)	Ag (koz)
Measured	1.9	2.72	0.14	2.38	1.37	31	51.9	2.6	45.4	84	1,895
Indicated	5.7	2.31	0.11	2.68	1.74	29	17.3	0.8	20.1	42	688

**Notes:**

1. CIM Definition Standards (2014) definitions were followed for Mineral Resources.
- Mineral Resources are reported above a cut-off NSR value of US\$29/t for Mineral Resources amenable to open-pit mining and the underground portion of the 2021 Mineral Resources are reported with mining shapes which were generated using a \$105/t NSR cut off value.
3. The NSR value is based on estimated metallurgical recoveries, assumed metal prices, and smelter terms, which include payable factors treatment charges, penalties, and refining charges.
4. Mineral Resources are estimated using the metal price assumptions: US\$4.00/lb Cu, US\$1.05/lb Pb, US\$1.30/lb Zn, US\$1,800/oz Au, and US\$24/oz Ag.
5. Metallurgical recovery assumptions were based on three mineral types defined by the metal ratio Cu/(Pb+Zn):
  - a) Zinc Mineral (Cu/(Pb+Zn) <0.33): 86% Cu, 90% Pb, 97% Zn, 68% Au and 78% Ag
  - b) Mixed Cu/Zn Mineral (0.335 Cu/(Pb+Zn) \$3.0): 86% Cu, 82% Pb, 95% Zn, 55% Au and 67% Ag
  - c) Copper Mineral (Cu/(Pb+Zn) >3.0): 80% Cu, 37% Zn, 14% Au and 29% Ag
6. NSR factors were neral on the metal Pati /72):
  - a) Zinc Mineral (Cu/(Pb+Zn) <0.33): 53.41 US\$/% Cu, 7.99 US\$/% Pb, 13.47 US\$/% Zn, 30.91 US\$/g Au and 0.39 US\$/g Ag
  - b) Mixed Cu/Zn Mineral (0.335 Cu/(Pb+Zn) \$3.0): 58.99 US\$/% Cu, 7.05 US\$/% Pb, 13.41 US\$/% Zn, 25.12 US\$/g Au & 0.34 US\$/g Ag
  - c) Copper Mineral (Cu/(Pb+Zn) >3.0): 57.83 US\$/% Cu, 6.84 US\$/g Au and 0.19 US\$/g Ag
7. Bulk density interpolated on a block per block basis using assayed value, the correlation between measured density values and iron content, and base metal grade. The bulk densities range between 2.1 t/m<sup>3</sup> and 4.6 t/m<sup>3</sup> Mineral Resources are inclusive of Mineral Reserves.
- Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
10. The underground portion of the Mineral Resources are reported within underground reporting shapes and include low grade blocks falling within the shapes.
11. QP is not aware of any environmental, permitting, legal, title, taxation, socio-economic, marketing, political, or other relevant factors that could materially affect the Mineral Resource estimate.
12. Numbers may not add due to rounding.

# WORKING TOWARD 2030 SDGs

The U.N. Sustainable Development Goals are embedded in our operations.

**Projects for the economic and social inclusion of the population in vulnerable situations:**

- Livestock and Family farming projects.
- Supporting agricultural initiatives to improve family and community income.

**Projects to strengthen family skills, social cohesion and use of free time:**

- Football schools
- Capacity development process.
- Community leadership schools to strengthen social cohesion.
- Parent talks and schools: positive parenting, nutrition, life and work skills.

**Technical assistance and processes to reduce emissions:**

- Aiming to reduce carbon emissions
- Reforestation initiatives

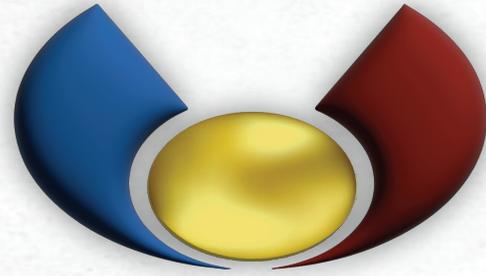

- Livestock and Family farming projects.
- Supporting agricultural initiatives to improve family and community income.

**Relationship strategy with international cooperation agencies, organizations and fundraising schemes.**

Notes: ONU, 17 Goals to Transform Our World, 2023. <https://www.un.org/sustainabledevelopment/es/objetivos-de-desarrollo-sostenible/>
